Essentials for Healthy Home Practitioners Course Registration

Course Date: Thursday & Friday, May 6th & 7th, 2010, 8-5:30 on day 1 & 8-5 on day 2.

Course Location: Children's Mercy Hospital, Hospital Hill Bldg, Rm 538/539
2401 Gillham Rd, Kansas City, MO 64108

Course Description:

If you visit homes to provide health or inspection services of any type, you will benefit from the Essentials for Healthy Homes Practitioners Course. The training will help you understand the connection between health and housing and how to take a holistic approach to identify and resolve problems, which threaten the health and wellbeing of residents.

Everyone from a public health nurse visiting a client to an environmental health professional doing a rodent inspection will gain insight into how housing and health are related and actions they can take to improve the health of their clients. This two-day course brings together professionals with a variety of perspectives and experiences in a series of exercises — keeping the training lively and engaging.

The training complements hazard-specific training in leadbased paint, radon, mold, pests, and asbestos. It identifies root causes of health problems in a home and links them to seven principles of healthy housing: keep it dry; keep it clean; keep it pest-free; keep it ventilated; keep it safe, avoid contaminants; and maintain the house. Course participants will have a better understanding how to collaborate to make healthy homes a reality in their community.

Cost of this 2 day course is \$75.00 and includes the course manual. The price includes continental breakfast and lunch on both days, and refreshments. For more information on the course, contact: Erica Forrest, CMH Environmental Health Program, 816-983-6806, or email at eforrest@cmh.edu.

This course is presented through a partnership between the National Center for Healthy Housing, the Children's Mercy Hospitals and Clinics, the Kansas City Missouri Health Dept., and the Kansas Dept. of Health and Environment Healthy Home and Lead Poison Prevention Program.
