Introduction Chi-Square Test The Monte Carlo Simulation

"Globally, more than 80 per cent of clinical trials on

T).
(2) On a scale of 1-10, how confident are you in your answer to (1)? (Divide by 10 to get P).

$W_{m+1,b} + \dots + W_{n,b}$ will represent b estimates of the total duration of the clinical trial. The results from this simulation are shown in Table 1 and Figure 1.
