

Date: _____

To whom it may concern:

_____, has a medical device called a Dynamic Compression Brace. The metal brace goes around the chest and is used for correction of a pectus carinatum. Pectus carinatum is a chest wall abnormality that results in protrusion of the sternum and rib cartilages. Please allow the brace to be worn during school with the exception of taking it off during physical education or sports. There is no activity restrictions and it can removed anytime.

If you have any questions, please feel free to contact us 816.234.3199.

Sincerely,

Children's Mercy Pectus Team
