

Atopic Dermatitis

A Visual Guide to Diagnosis Severity

Document finalize/revise: 08.2020

Owner: R. Flynn, CPNP-PC

Mild Atopic Dermatitis

Localized mild
eczematous plaques

Diffuse mild
eczematous plaques

4.7.2020

Mild-Moderate Atopic Dermatitis

Diffuse mild-moderate eczematous plaques

Localized mild-moderate eczematous plaques with lichenification and excoriations

Moderate Atopic Dermatitis

Moderate eczematous plaques with excoriations

Moderate eczematous plaques with excoriations

Widespread nummular
eczematous plaques

Localized
eczematous
plaque with
edema and
erosions

Localized
moderate
eczematous
plaque with
lichenification

Widespread nummular
eczematous plaques

Moderate eczematous plaques
with lichenification and
excoriations

Localized lichenified eczematous plaques

Moderate - Severe Atopic Dermatitis

Moderate diffuse eczematous plaques with excoriations

Moderate nummular eczematous plaques

Diffuse erythema with widespread eczematous plaques
Lichenified plaques on knees with diffuse erosions on popliteal fossae

Severe Atopic Dermatitis

Diffuse erythema with widespread
eczematous plaques
Lichenified plaques on ankles and dorsal
feet with diffuse erosions

Diffuse eczematous plaques with extensive erosions involving extremities
Possible secondary infection involving antecubital fossae

A.

A. Diffuse eczematous plaques with extensive erosions
Possible secondary infection

B. Thick nummular eczematous plaques with extensive erosions
Possible secondary infection

B.
