

ECONOMIC IMPACT OF CHILDREN'S MERCY KANSAS CITY

In 2020, BW Research Partnership examined the economic and fiscal impacts of the Children's Mercy (CM) organization on Missouri, Kansas and the five counties that make up the Kansas City region (Jackson, Clay and Platte counties in Missouri, and Johnson and Wyandotte counties in Kansas).

This economic impact analysis examines direct, indirect, and induced effects. Direct effects are associated with initial job creation. Indirect effects include supply chain impacts, and induced effects are the result of direct and indirect workers spending their wages. The economic impact is displayed in terms of Jobs Created, Labor Income (paychecks and benefits received), Value Added (equivalent to Gross Regional Product), and Output (value added plus money spent on other industries).
